Biography

Foteini Christidi is a clinical neuropsychologist (PhD). She holds a BA in Psychology (Dpt of Psychology, Panteion University) and holds an MSc in Clinical Neuropsychology and a PhD (School of Medicine, NKUA). She was trained (>2.250h) in neuropsychological assessment (Aeginition Hospital) and advanced neuroimaging techniques (USA: Cognitive Neuroscience Laboratory, Baylor College of Medicine, Houston / Switzerland: Dpt of Neuroradiology, University Hospital of Zurich, Zurich). She was also trained in Liaison Psychiatry (UK: Queens Medical Center, Dpt of Psychological Medicine, Nottingham). Since 2007, she has a long, daily clinical experience in neuropsychological assessment in healthy and clinical groups. She has a long research experience with national and international collaborations, >100 papers in peer-reviewed journals and >150 publications in national and international peer-reviewed conferences. With her colleagues, they are one of the international pioneer research groups examining memory and hippocampal white matter integrity (i.e. perforant pathway) using diffusion tensor tractography. She contributed to the original English version of the "The Oxford Handbook of Functional and Neuroimaging in Cognitive Neurosciences and Neuropsychology" (AC Papanicolaou, eds). She is a reviewer in high-impact peer-reviewed journals and external reviewer in grant proposals. Since 2002, she has been awarded 6 times by the State Scholarships Foundation (I.K.Y.) through different programs. She has awards for best presented studies in national and international conferences. She is providing lectures in MSc programs in Greece regarding neuropsychological assessment and advanced neuroimaging techniques for studying human behavior. She has recently been elected as Assistant Professor in Neuropsychology, Dpt of Psychology, NKUA.
