Biography

Dimitrios Mytilinaios is a forensic pathologist and passionate neuroanatomist with a dynamic career in medicine and education. After earning his medical degree at Aristotle University of Thessaloniki, he specialized in forensic pathology at the University of Athens and served as a forensic pathologist for the Greek Army. Fueled by his fascination with the human brain, Dimitrios completed his PhD in neuroanatomy in 2011 and began teaching anatomy and neuroanatomy at the University of Athens and the European University of Cyprus. Today, he leads the content team at Kenhub, the world's leading anatomy-learning platform, that helps millions of learners worldwide learning anatomy. An advocate for neuroscience outreach, Dimitrios has organized impactful Brain Awareness Week events, engaging thousands of students. Besides leading the content team at Kenhub, he is a co-ordinator of the Athens International Master's Programme in Neurosciences. He has published several papers in the field of anatomy and neurosciences and he is an editor for the journal Frontiers in Neuroanatomy.
